

Online Data Appendix

The Impact of Dementia and Extremity Injuries on the Plasticity of Long-term Care Demand

An Analysis of Counterfactual Projection Scenarios Based on German Health Insurance Routine Data*

Alexander Barth

In this online data appendix, we provide the PDE project files for all status-quo and counterfactual scenarios described in our paper. They include the base year population and all required transition rates for each scenario. They can be loaded directly using the PDE software (available at <http://webarchive.iiasa.ac.at/Research/POP/pub/software/pde/>) to obtain all results as shown in the paper

Table A1 shows the projection variants and corresponding file names

Tab. 1: Online data appendix: Variants and PDE file names
